Journal of Chemical Crystallography —Volume 26, 1996

Formerly *Journal of Crystallographic and Spectroscopic Research*

Journal of Chemical Crystallography is an international interdisciplinary medium for the rapid publication of research results in the general area of crystallography and its relation to problems of molecular structure. The journal publishes papers reporting structural studies based on X-ray, electron, and neutron diffraction and theoretical studies. The format is intended to allow authors the opportunity to discuss the relationship between the results of crystal structure analyses and structural or synthetic chemistry. The emphasis is on the results of the structure determination, not on the determination itself. The journal addresses itself not only to crystallographers, but also to chemists, physicists, biochemists, biologists, and all others interested in the results of structural investigations. *Journal of Chemical Crystallography* publishes reports of original research as full-length Articles and Notes; it also publishes Book Reviews. All papers are published in English, and every effort is made to publish Articles and Notes within six months of manuscript receipt. The submission of a manuscript is a representation by its contributors that the manuscript has not been copyrighted, published, or submitted for publication elsewhere. Papers accepted for publication become the copyright of the publisher. The content of papers is the sole responsibility of the contributors, and publication in *Journal of Chemical Crystallography* does not necessarily imply the Editors' and the publisher's concurrence.

Crystal and molecular structure of heptacyclo[9,6,1,$1^{4,7}$,$1^{14,17}$,$0^{2,10}$,$0^{3,8}$,$0^{1,13}$]-eicosa-3(8),5,12,15-tetrene-9,18-dione 559
J. Zhu, A. J. H. Klunder, J. M. M. Smits, Paul T. Beurskens, and Gezina Beurskens

Molecular structure of $[(^tBu)_2Al(\mu\text{-}NH^tBu)]_2$ 563
Simon G. Bott, Yoshihiro Koide, and Andrew R. Barron

Crystal and molecular structure of tricarbonyl(5,6,7,8-η^4-5,7-nonadien-2,4-diol)iron, $C_{12}H_{16}O_5Fe$ 569
Victor G. Young, Jr., Bireshwar Dasgupta, and William A. Donaldson

The crystal structure and supramolecular chain of $[La(NO_3)_3(OH_2)_2(phen)] \cdot$ 15-crown-5 573
Zhen Ping Ji and Robin D. Rogers

Molecular structure of 4-(3,5-dimethylpyrazol-1-yl) benzoic acid trifluoracetate 579
Concepción Foces-Foces, Carlos Cativiela, María Mar Zurbano, Isabel Sobrados, Nadine Jagerovic, and José Elguero
